

# Binoculars

## The workbench

- Scissors
- Tape
- String
- 2 toilet rolls
- Foil
- Colored cellophane
- 1 long pipe cleaner

### Step 1.

Cut out 2 small pieces of cellophane to fit over the ends of the toilet rolls, then attach them with tape (refer to the picture). Cut a small length of foil the same length as the toilet rolls then wrap the foil around the toilet rolls and secure with tape.

### Step 2.

Place 2 small holes at the top and bottom of both toilet rolls, making sure that the holes are in the same spot on both rolls. Thread the pipe cleaner through both holes closest to the cellophane ends, then thread through the two end holes securing the pipe cleaner by twisting. Tape the pipe cleaner to the inner sides of the toilet rolls.

### Step 3.

Cut enough string to place over your head, and so you can hold the binoculars up to your eyes. Cut 2 holes at the end of each toilet roll, then thread the string through and tie into a knot at the ends.
