

Newspaper BBQ box

The workbench

- Cardboard box with lid
- PVA glue
- Scissors
- Estapol gloss or varnish
- Glue brush
- 1 packet of wooden beetles or animals of your choice

Step 1.

Cut the newspaper into small pieces; then glue them all over the box so that it is all covered both inside and outside of the box.

Step 2.

Once the box has dried give it a coat of varnish and again allow it to dry before giving a 2nd coat of varnish, so it ends up with a nice shine and a water resistant finish.

Step 3.

Glue on a trail of beetles over the box lid and side, then fill up the box with newspaper scraps and keep it handy so mum or dad can clean the BBQ down before using.
