

Painted lights

The workbench

- Plastic push in battery operated lights
- Semco peel n' stick glass paint

Step 1.

Paint a picture onto the top of the light, (do not completely cover the light in with paint or the glow will be dull when the light is turned on, refer to the picture).

Step 2.

Paint a pattern around the sides of the light and allow to completely dry before touching.

Step 3.

Put in the batteries, and wait till it's dark then use the light for parties or BBQ's (see light instructions for full details on use).
