

Goodies box

The workbench

- Wood glue or PVA glue
- Colored icy pole sticks
- Glue brush
- Thin tinsel
- Craft glue

Step 1.

Place glue all over one side of 2 icy pole sticks. Going in the opposite direction to those 2 sticks stick more sticks all down the 2 original sticks side by side (refer to the pictures) to form the base.

Step 2.

Paste glue onto 2 sides of the base, then add 2 more sticks onto the base. Add glue to another 2 sticks but only onto the ends (refer to the picture) then stick them across the previous 2 sticks already glued onto the base. Repeat this process until you have reached the desired height.

Step 3.

Using the craft glue stick the tinsel around the top of the box and then allow time to dry completely before moving.
