

# Christmas glasses

## The workbench

- Semco peel n' stick paints
- Smooth plastic or glass board (ice cream container lid)
- Glasses

### **Step 1.**

Paint the outline of the picture.

### **Step 2.**

Fill in the picture leaving details like eyes, nose until last and allow 24 hours drying time; the pictures should peel away easily from the board, if they do not allow more drying time.

### **Step 3.**

Peel off the pictures from the board and stick them directly onto the glass outer sides. No glue is required as the pictures will stick to the glass without it. (do not submerge the glasses into water to wash)
