

Bubble headed dragon

The workbench

- 1 foam cup
- 1 small foam ball
- 12 long pipe cleaners (make sure 1 is red in color)
- Green glitter
- 2 plastic push in eyes
- 1 glitter pom pom small
- 1 small foam star
- Poster paint (non toxic)
- Paint brush
- 1 sheet small colored paper
- 1 medium foam ball that fits snugly into end of the foam cup
- Craft glue

Step 1.

Thread a pipe cleaner through the bottom of the cup and push the end into the foam ball. Paint the cup and both the balls all over, then while the paint is still wet sprinkle over with glitter. Roll the larger ball into the glitter to get a thick coverage over the ball and leave to dry.

Step 2.

Cut 2 small circles out of the colored paper then push the plastic eyes through the middle of the circles and into the smaller ball attached to the cup for eyes. Glue on the pom pom nose then cut a small length of red pipe cleaner and bend it into a zig zag shape; bend both of the ends down and push them into the foam to secure the mouth, repeat this process for the eyebrows.

Step 3.

Glue in the larger ball to the inside of the cup, then using 8 pipe cleaners stick one end into the cup, then bend the other end around and into the other end of the cup (refer to the picture) to secure the wings.
