

Wax painting

The workbench

- Paper
- Poster paint (non toxic)
- Candle (long)
- Glitter
- Paint brush

Note to parents: this activity requires strict adult supervision and help during step one only. Once this step is complete remove the candle and it's lighter and keep out of the reach of children.

Step 1.

Light the candle. Placing it side ways, hold the candle 10cm above the paper allowing the candle wax to fall onto the paper.

Step2.

With the paintbrush, brush colored paint straight over the melted wax drops then decorate with glitter. Allow too dry.

Step 3.

Hang the painting on a window, so the light shines through the wax drops.
