

Drink bottle

The workbench

- Markers, pencils
- Clag
- Scissors
- Self laminating sheet or laminating machine
- Colored paper different colors
- Glitter
- Plastic stars
- Sticky tape
- 1litre water bottle
- Plastic curly straw

Step 1.

Get an adult to cut the top off the water bottle. Cut the different colored paper into long strips 1-2 cm wide then decorate the paper strips with markers or pencils and glue on the stars and glitter, leave to dry.

Step 2.

Place the paper strips inside the self-laminating sheet and close (refer to the picture) then cut the laminated sheet into strips around the colored paper so that they remain sealed.

Step 3.

Wrap the individual strips around the water bottle and secure with sticky tape, leaving a gap between each strip. Put in the straw, and fill up with your favorite drink.
